

About Us

CSR is a strategy consultancy that enables organizations to define and attain their goals. Our team of subject matter experts works directly with the organization's leadership and stakeholders to assess their organization and develop a strategic plan. We collaborate to define or refine the organization's mission, vision, and values and then actively use them as the guardrails for strategic decision making. We work to implement the plan from within the organization. Our goal is to make our clients into higher-performing organizations that are better aligned to their mission.
